solutions.

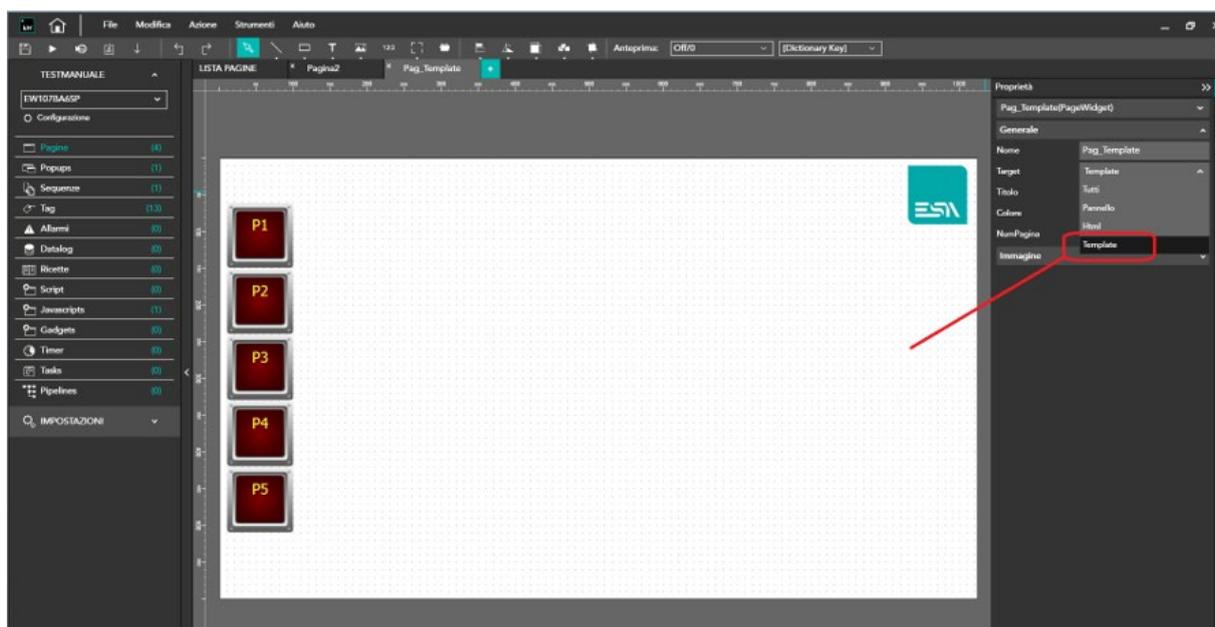

Introduction

You can use a TEMPLATE page to be used as common background page for one or more pages in the project.

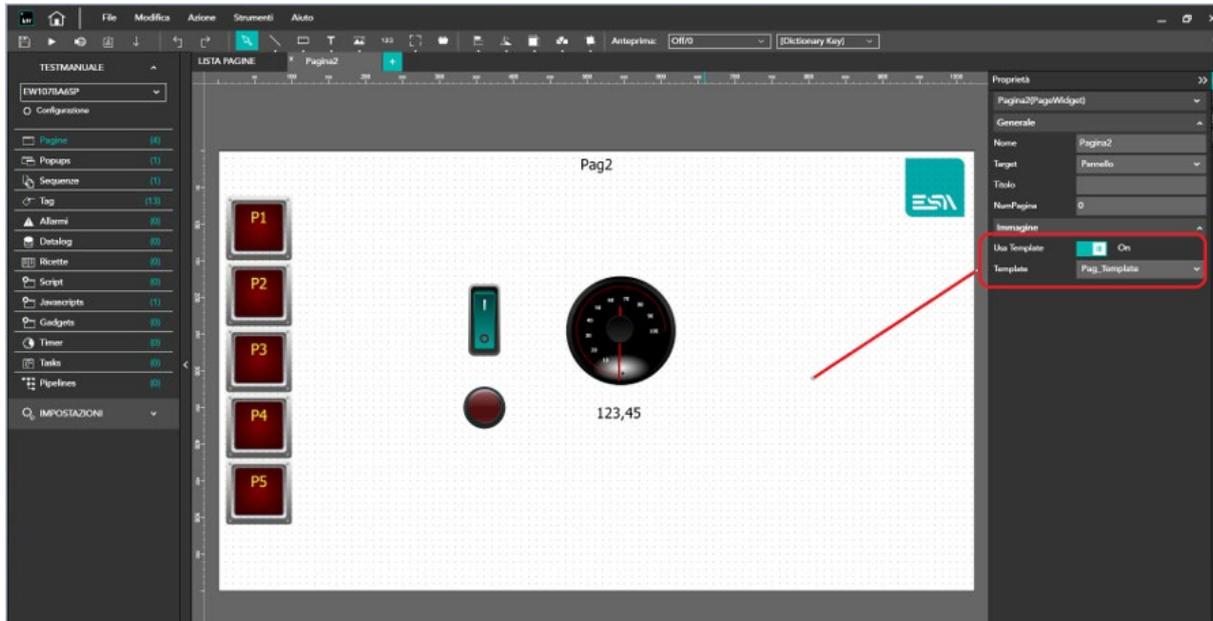

How to do:

1. I configure the TEMPLATE page

2. Open a project page and use the previously configured TEMPLATE page

3. The page will use the TEMPLATE page as background of the page-specific objects

N.B. Any change on the TEMPLATE page will affect all pages that use this template making the changes available already on the other pages
